Certificate of Origin

GREENLAND RUBY

This certificate guarantees the authenticity of this gem, and that it is of Greenlandic origin.

Greenland Ruby gems are traceable from mine to market by way of their unique reference number, which is allocated at the time of export from Greenland.

FO5035-0067233

Unearthed at a remote site in Southwest Greenland, the rubies and pink sapphires from this region are said to be the oldest on Earth.

These icy gems have their own identity and tell the story of being buried under the Polar ice Cap, which is slowly melting to reveal these rare treasures, well over a billion years old.

This pristine location hosts the most modern and sophisticated state-of-the-art ruby mining operation, adhering to the highest of environmental and human rights standards and best practices. Gems mined here are identified as such and should not be compared to rubies and pink sapphires from any other region.

Greenland is the largest island in the world and is an autonomous constituent country within the Kingdom of Denmark. It has its own stable government and economy. Early Viking settlers gave Greenland its name, attempting to entice explorers and settlers with dreams of lush green landscapes.

Greenland Ruby A/S holds
Exploitation License #2014/21, as issued by
The Government of Greenland.
